

University of Latvia

Part-time placement opportunities in Riga are as follows:

1. Collective Intelligence Research Center (CiRC)

Collective Intelligence Research Center is an NGO with a strong focus on information society and its potential interaction models for common welfare. Keywords: collective intelligence (CI) methods, CI model development and research, social projects and entrepreneurship, interdisciplinary collaboration, process of gamification.

More information: www.intelligences.com

2. Latvian IT Cluster / DEMOLA Latvia

Demola Latvia is one of the Latvian IT Cluster projects. Demola is an open innovation platform and university-business collaboration model for the creation of new products and services. Student teams work to solve challenges handed to them by companies and other organizations. The projects lead to 'demos' and prototypes, a majority of which are bought by the companies and organizations via a licensing system devised for the Demola framework. More information: www.itbaltic.com / www.demola.lv

3. Institute of Mathematics and Computer Science (IMCS), University of Latvia

Apart from research, the Institute of Mathematics and Computer Sciences (IMCS) of the University of Latvia has always been involved in commercial software development. IMCS UL is also one of the largest Internet service providers in Latvia (SigmaNet, earlier known as LATNET).
